Part 1: Company Overview

1.1 Introduction

Shezan International Limited is a well-known food and beverage company in Pakistan. It was established in 1964 by the Shahnawaz Group in Lahore. The company offers a wide range of products including juices, soft drinks, sauces, pickles and canned foods. Some of its popular brands are **All Pure** and **Twist**.

Shezan is known for using fresh fruits and vegetables, many of which come from its own farms. The company has expanded its business internationally and now exports its products to more than 20 countries such as the United States, Canada and countries in Europe.

1.2 Product Categories

Beverages / Squashes	Jams & Jellies	Food Essentials	Ketchup & Sauces	Pickles & Chutney
Syrups Happy Farm Twist-C Fruit Drinks Juice Pack Squashes	Regular Diet Jams and Marmalades	Canned foods Salt Ispaghol	Ketchup & sauces Chinese sauces Vinegar	Pickles Pickles in oil Pickles in vinegar Chutney

Selected Company at a Glance

Headquarters: Lahore, Punjab | **Plants:** Lahore, Karachi, Hattar (KPK)

Own farms: Nawazabad Farms, Mirpurkhas, Sindh | **Export reach:** 20+ countries

Certifications highlighted: ISO, HACCP and Halal

Part 1.A: Supply Chain Model

The Shezan supply chain runs from its own farms and external suppliers, through three manufacturing plants and a network of warehouses, to distributors, retailers and finally the customer. Each stage is described below.

2.1 Suppliers

- **Own farms:** Shezan has its own farms of fruit and vegetables (Nawazabad Farms, located in Mirpurkhas, Sindh). Transportation of this produce is done through the company's own vans.
- **Packaging supplier – Tetra Pak:** Shezan uses advanced packaging solutions from Tetra Pak.
- **Sugar supplier – Shahtaj Mills.**
- **External suppliers:** Shezan depends on external suppliers for citric acid, concentrates, colours, preservatives, salt, taste enhancers, etc. (data of external suppliers is confidential).

2.2 Manufacturers and Manufacturing Process

Manufacturing Plants

Plant	Location & Address	Role
Plant 1 (Headquarters)	Lahore, Punjab 56-Bund Road, Lahore – 54500	Original and main plant where Shezan began fruit processing and boiling. A bottle-filling plant and an independent Tetra Brik plant were added later. All core products (juices, jams, ketchups, pickles and squashes) are produced here.
Plant 2	Karachi, Sindh Plot No. L-9, Block 22, Federal "B" Industrial Area, Karachi – 75950	A separate unit installed in Karachi in 1980–81. It caters to Karachi/Sindh and also meets export demand.
Plant 3	Hattar, Khyber Pakhtunkhwa (KPK) Plot No. 33-34, Phase III, Hattar Industrial Estate, Hattar	A juice factory decided upon and installed at Hattar, KPK (1990). The plant serves Northern Pakistan.

Manufacturing Process

1. **Procurement of raw materials** – Many fruits and vegetables are obtained from company-owned farms; sugar comes from Shahtaj Sugar Mills; other ingredients are purchased from external suppliers. All materials go through quality inspection.
2. **Inspection and sorting** – Raw materials are carefully checked and graded. Only high-quality fruits, vegetables and ingredients are selected; damaged or low-quality items are rejected.
3. **Processing / extraction** – Selected raw materials are processed depending on the product: juices (pulp extraction from fruits followed by the juice-making process), ketchup/sauces (crushing and cooking of vegetables), jams (fruit pulping and boiling) and pickles (curing and preparation). Heat treatment is often used to ensure safety and preservation.
4. **Heating / cooking** – Raw material is heated or cooked to extract flavours, kill bacteria and improve texture.

5. **Cooling and storage** – Processed material is cooled to controlled temperatures and stored in tanks or containers before further processing.
6. **Mixing and formulation** – Ingredients are added based on product type (sugar, salt, preservatives, food colours, flavour enhancers, acidity regulators). Mixing ensures consistent taste, proper texture and standard quality.
7. **Packaging** – Finished products are packed using Tetra Pak, bottles and jars. Packaging sizes vary by product type, and ensures hygiene, long shelf life and attractive appearance.
8. **Quality control** – Final products are tested for taste, safety and packaging quality. Only approved products are released to the market.

Product Mix Table

Category	Product	Variations	Size
Beverages	Happy Farm	Grape, peach, mango, apple, orange, strawberry, pomegranate	200 ml, 1000 ml
	Twist	Apple, mango, lychee, pineapple, strawberry, punch, mixed fruit	200 ml
	Fruit drink	Fruit punch, apple, mango	200 ml, 1000 ml
	Fruit drink in Shezan bottle	Mango, lemon, barley, lychee, grape, punch, pomegranate	300 ml, 240 ml
	Juice pack	Mango, apple, fruit punch	–
	Happy 125 ml	Apple, grape, mango, mixed fruit	125 ml
Squashes & Syrups	Squashes	Lemon barley, anar, lemon, orange, mango	800 ml, 1500 ml
	Syrups	Anar, sandal, samarqand	800 ml
Jams, Jellies & Marmalades	Jams and marmalades (regular)	Orange (marmalade), apple, mango, pineapple, strawberry, mixed fruit	200 g, 410 g, 2 kg, 7 kg, 25 kg
	Jams (diet)	Orange, mixed fruit, apple	410 g can
Food Essentials	Canned fruits and vegetables	Saag, sweet corn, peas, peach, fruit salad	450 g, 850 g, 880 g
	Ispaghol	Large, small, sachet	–
	Salt	Iodized salt, table salt	800 g
Ketchup & Sauces	Ketchup	Tomato ketchup	Sachet, 100 g, 500–1000 g, 1 kg, 1.0–6 kg
	Sauces	Chili garlic sauce, green chilli sauce	100 g, 500 g, 310 g, 1000 g, 1 kg
Chinese Sauces & Vinegar	Chinese sauces	Soy sauce and chili sauce	310 ml, 800 ml, 3100 ml
	Vinegar	Brown vinegar, white vinegar	310 ml, 800 ml, 3000 ml

Table: Shezan product mix (sizes as recorded in the source notes)

Warehousing (Storage)

After production and packaging, finished goods are stored in local storage facilities. These facilities act as distribution points before delivery.

- **Factory-based warehouses:** Lahore (head factory and main warehouse); Karachi (factory and regional storage for Sindh); Hattar (KP industrial estate factory and warehouse).
- **Regional distribution / sales offices (mini warehouses):** Islamabad (I-9 industrial area), Faisalabad, Multan, Gujranwala and Karachi.

2.3 Distributors

- **Offices:** Shezan has offices in Lahore, Multan, Faisalabad, Peshawar and Karachi.

Domestic Distributors

- Shezan has its own distribution system in Lahore and supplies using its own vans.
- Distribution in other cities is outsourced to third parties.

International Distributors

Country	Distributor	Role
United Kingdom	Nuovo Foods Limited	Authorized to import and distribute Shezan products in England / UK markets
Canada	Target Foods	Authorized distributor for Shezan products in Canada
Bangladesh	Sajeeb Foods	Distributes Shezan products locally in Bangladesh

2.4 Retailers

Domestic Retailers

Supermarkets & Hypermarkets	Cash & Carry / Others
Imtiaz Supermarket	Metro Cash & Carry
Carrefour (hypermarket)	Chase / Chase Up
Naheed Supermarket	SPAR Market
Bin Hashim Supermarket	Al-Fatah
Punjab Cash & Carry	Save Mart

General Shops & Kiryana Shops (examples)

- **Lahore:** Ghani General Store (DHA), Imran General Store (Model Town), Madina General Store (Shahdara).
- **Karachi:** Zahid Nihari General Store (North Nazimabad), Siddique General Store (Gulshan-e-Iqbal).

- **Islamabad / Rawalpindi:** Tariq General Store (Blue Area, Islamabad), City General Store (Sadar, Rawalpindi).

Petrol Station Stores

Oil Company	Store
PSO	Shop Stop
Shell Pakistan	Shell Select
Hascol Petroleum	Hascol Mart
Attock Petroleum	Convenience Store

Roadside Shops

- Daewoo and Faisal Movers bus terminals.
- Motorway food courts at Kallar Kahar, Khanewal and Pindi Bhattian.

2.5 Customers

- Households across Pakistan use ketchups, juices and Chinese sauces.
- International customers.
- Local dhabas, roadside restaurants, wedding caterers, and small cafés in schools and universities use Shezan ketchup, sauces and pickles in their cooking.

Part 1.B: Flow of Goods, Information and Finance

The supply chain is supported by three interconnected flows: the physical flow of goods from suppliers to customers, the flow of information (demand signals and plans) and the flow of finance (money moving back up the chain).

3.1 Flow of Goods

Goods flow forward from suppliers (local, imported ingredients and own farms) to the three manufacturing plants; then through packaging (Tetra Pak and bottles), central warehousing, domestic and international distributors and retailers, until they reach the end consumer.

Figure 1: Flow of goods in the Shezan supply chain

3.2 Flow of Information

Information starts with customer demand (orders and forecasting), moves to planning (demand and capacity plan), then procurement (supplier orders issued), production (manufacturing schedule) and finally distribution (delivery to markets).

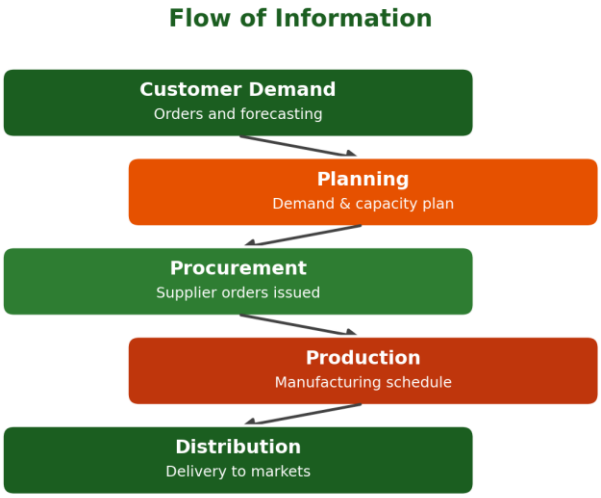

Figure 2: Flow of information

3.3 Flow of Finance

Money flows in the opposite direction to goods: customers buy and pay retailers, retailers pass revenue to distributors, distributors send revenue to Shezan, and Shezan pays its suppliers.

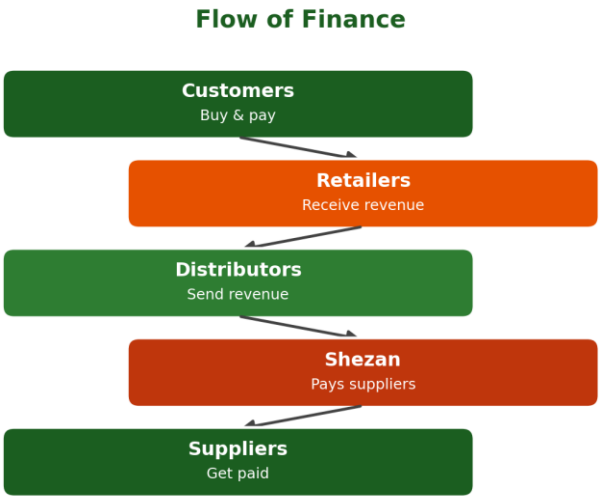

Figure 3: Flow of finance

Part 1.C: Competitor Analysis

Shezan's supply chain is compared with three major competitors: **Nestlé Pakistan**, **Mitchell's Fruit Farms** and **Gourmet Foods** across sourcing, production and logistics.

4.1 Sourcing

Shezan	Nestlé	Mitchell's Fruit Farms	Gourmet Foods
• Fruits and vegetables from own farms • Sugar from Shahtaj Mills • Imports non-available ingredients	• Raw milk from ~90,000 farmers (Punjab/Sindh) • Other raw materials mostly local • Global sourcing (e.g. coffee) • IFC dairy scheme	• Own farms of fruits and vegetables • Local raw material from Pakistan • Some outsourced to other farms when needed	• Uses local grain, dairy and sugar (owns Rasool Nawaz Sugar Mills) • Other ingredients sourced domestically or via import

4.2 Production

Shezan	Nestlé	Mitchell's Fruit Farms	Gourmet Foods
3 plants (Lahore, KPK, Karachi)	4 factories; dairy production in Kabirwala and Sheikhupura; bottled-water plants in Islamabad and Karachi	Single large plant in Renala Khurd	7 processing units (bakery, dairy, etc.); owned outlets in major cities

4.3 Logistics

Shezan	Nestlé	Mitchell's Fruit Farms	Gourmet Foods
• Distributes via 100+ owned trucks • Uses 3rd parties to cover Pakistan and exports • Little cold chain needed (ambient juices / pickles)	• Chilled transport for dairy • Road-safety technology in trucks • Multi-drop delivery • Exports via air/sea from Karachi	• 270 distributors (large and small) nationwide • Direct delivery trucks to big chains; local 3PL for smaller orders • Minor exports (UK, UAE, etc.) • Limited cold chain (ambient goods)	• Omni-channel: own 250 stores and traditional retail partners • Refrigerated vans for fresh dairy • Cold chain for dairy and ice-cream • Extensive last-mile home-delivery app

Key Takeaway

Shezan keeps tight control over raw-material sourcing through its own farms and its own truck fleet, and its mostly ambient products avoid heavy cold-chain costs. However, Nestlé and Gourmet Foods have wider, more flexible distribution reach (including home delivery), which Shezan can learn from.

Part 2: Marketing Research Model

This section presents a structured seven-step marketing research model for Shezan International.

5.1 Research Problem Definition

The problems faced by Shezan are:

- Strong competition from companies like Nestlé, Gourmet Foods and Mitchell's Fruit Farm.
- Customers shifting towards other brands.
- Low awareness about the nutritional benefits of Shezan products due to limited promotional activities.

5.2 Research Questions

- How can we attract more customers and increase sales?
- What do customers like or dislike?
- Which products are selling and which are not?
- Why do some people buy Nestlé or Gourmet instead of Shezan?

5.3 Research Objectives

- Understand customer needs, preferences and wants.
- Find out how many people know the brand.
- Find out how many people like Shezan products, and which products lack and why.
- Study competitors' pricing, quality and promotion strategies.

5.4 Data Collection Methods

Type	Methods
Primary data	• Survey of 600 real people • Interviews and feedback • Free sampling
Secondary data	Company reports, authentic articles, sales records and competitor analysis

5.5 Analysis Techniques

- After collecting data: draw charts, visuals and comparisons of sales trends and customer feedback.
- Use AI tools, SPSS, Python, Tableau, Power BI and ANOVA to visualize and analyze the data.

5.6 Generating Insights / Decision Making

Question	Insight Generated
Who are Shezan customers?	Research divides customers into clear groups: price-sensitive families in rural areas; older and traditional buyers; health-conscious young adults.
What price should Shezan charge?	Research shows how much customers are willing to pay. E.g. if people say they would pay Rs. 50 more for a "no added sugar" juice, Shezan knows it can charge a premium for that variant without losing buyers.
Brand awareness	Surveys reveal how many customers know about the brand and how many do not, helping to expand social media presence.
Unmet needs	Focus groups uncover needs customers want but cannot find (e.g. a sugar-free jam).
Distribution gaps	Distribution analysis shows which cities or towns have very few Shezan products available, helping the company send more stock or find new shop partners in under-served areas.
Public sentiment	Social media analysis with AI tools helps understand positive and negative comments (e.g. complaints about pickle taste show where improvement is needed).

5.7 Recommendations

Recommendations are generated by looking at the competitive scoreboard (see Section 7) and are detailed in Part 3 of this report.

Part 2.A: Analysis of Competitors' Marketing Strategies

The table below compares Shezan with Nestlé, Gourmet Foods and Mitchell's Fruit Farm using the marketing mix (product, price, place, promotion) along with digital presence and packaging.

Attribute	Shezan	Nestlé	Gourmet	Mitchell's
Product Range	Juices, squashes, jams, pickles, ketchup, sauces, ispaghol, salt	Dairy, coffee, beverages, infant nutrition, water, confectionery	Bakery, sweets, dairy, jams, juices, gourmet cola	Squashes, jams, ketchup, pickles, spreads, RTE meals, chocolate
Pricing	Mid-range pricing; ISO and HACCP certified	Premium charges due to strong brand name	Mid pricing on bakery items; premium (gourmet cola)	Mid-range, affordable; FMCG standard pricing
Distribution (Place)	Nationwide retailers, Daraz, supermarkets, FoodPanda; exports to MENA	Extremely wide, ~70% market share; own factories; strong urban and rural presence	Own chain of 250+ outlets nationwide; retail partners and online/app orders (Gourmet Foods app)	National via wholesalers; traditional and modern retail
Promotion	Natural-quality images ("fresh fruits", halal certified); TV, print, social media (FB, IG, YouTube)	Heavy ads (TV, billboard, radio) with global tagline "Good food, good life"	Social media presence (FB, TikTok, Instagram); celebrity endorsements for baked goods; ads (TV, newspaper, billboards)	Ads (TV, print); limited modern campaigns; some TV commercials for pickles/juice; active on FB
Digital Presence	Website with recipes/blog; active on FB, Instagram, YouTube; sold via e-commerce (Daraz etc.)	Comprehensive website, investor portal; YouTube, FB, Twitter; strong e-commerce (Nestlé Online) and other platforms	Own app and website for home delivery; active on FB, Instagram; uses TikTok for youth marketing	Website for product info; FB page; lesser focus on e-commerce / mobile apps
Packaging	Recyclable / biodegradable packaging on many products; traditional bottles / jars with Shezan branding	Iconic packaging (MilkPak, Pure Life bottle, Maggi cubes); global R&D to improve sustainability	Bakery in branded paper / plastic; sweets in gift boxes; beverages in bottles	Glass jars and PET bottles (juices / pickles); durable packaging with traditional design

Observation

Shezan competes on mid-range pricing and natural, certified quality. Nestlé dominates promotion and distribution, Gourmet leads on digital/home delivery, and Mitchell's competes closely on price and product range. Shezan's main gaps are digital presence, promotional intensity and distribution reach.

Part 3: Proposed Marketing Strategy

7. Competitive Scoreboard

The scoreboard below compares Shezan with its competitors on seven attributes (scores out of 10). Shezan scores 6/10 in digital presence and marketing, 7/10 in distribution and packaging, compared with Nestlé's 9–10/10.

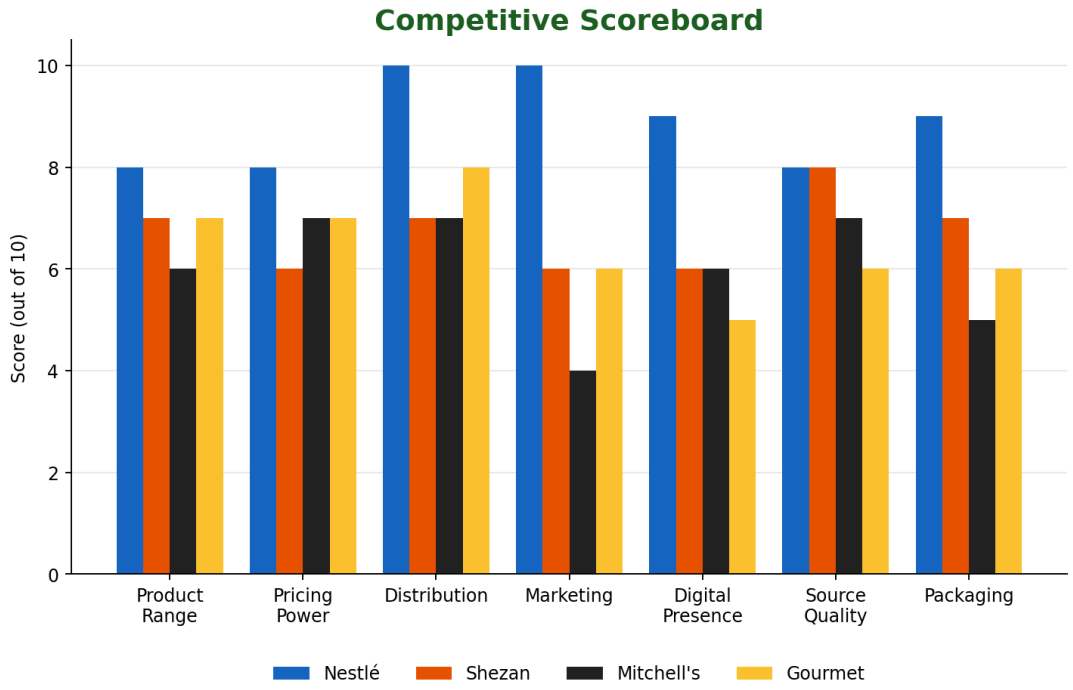

Figure 4: Competitive scoreboard (Nestlé, Shezan, Mitchell's, Gourmet). Competitor scores are read from the handwritten bar chart and are approximate.

8. Recommendations

01	Launch an aggressive digital marketing campaign	High Priority

Problem identified: Shezan scores 6/10 in digital presence versus Nestlé 9/10.

Recommended action:

- Run targeted YouTube, Instagram and TikTok campaigns using a "fresh from our own farms" narrative.
- Invest in influencer marketing for young, health-conscious buyers.

02	Expand distribution in underserved areas	High Priority

Problem identified: Shezan scored 7/10 in distribution versus Nestlé 10/10.

Recommended action:

- As distribution is limited in smaller cities, send more stock to small cities and shops.

03	Introduce a health-conscious product line	High Priority

Problem identified: Low customer awareness about Shezan's nutritional benefits.

Recommended action:

- Launch sugar-free jams, low-sodium ketchup and diet squashes.
- Highlight HACCP certification prominently on packaging and ads.

04	Revamp TV & outdoor promotional strategy	High Priority

Problem identified: Marketing score 6/10 versus Nestlé 10/10; promotions are limited.

Recommended action:

- Increase TV commercials during prime time and Ramadan.
- Use social proof (real family testimonials) instead of just product ads.
- Run billboard campaigns near schools and universities.

05	Introduce a customer loyalty and feedback program	Medium Priority

Problem identified: Surveys reveal customers don't know how many new products Shezan offers.

Recommended action:

- Launch a Shezan app-based loyalty program.
- Scan QR codes on packs to earn points (motivating the public to buy more products).
- Collect customer feedback through the app.

06	Modernize packaging	Medium Priority

Problem identified: Packaging score 7/10 versus Nestlé 9/10; customers want better aesthetics.

Recommended action:

- Introduce resealable pouches for jams.
- Premium glass jars for pickles / sauces.
- Add nutritional information to labels clearly.

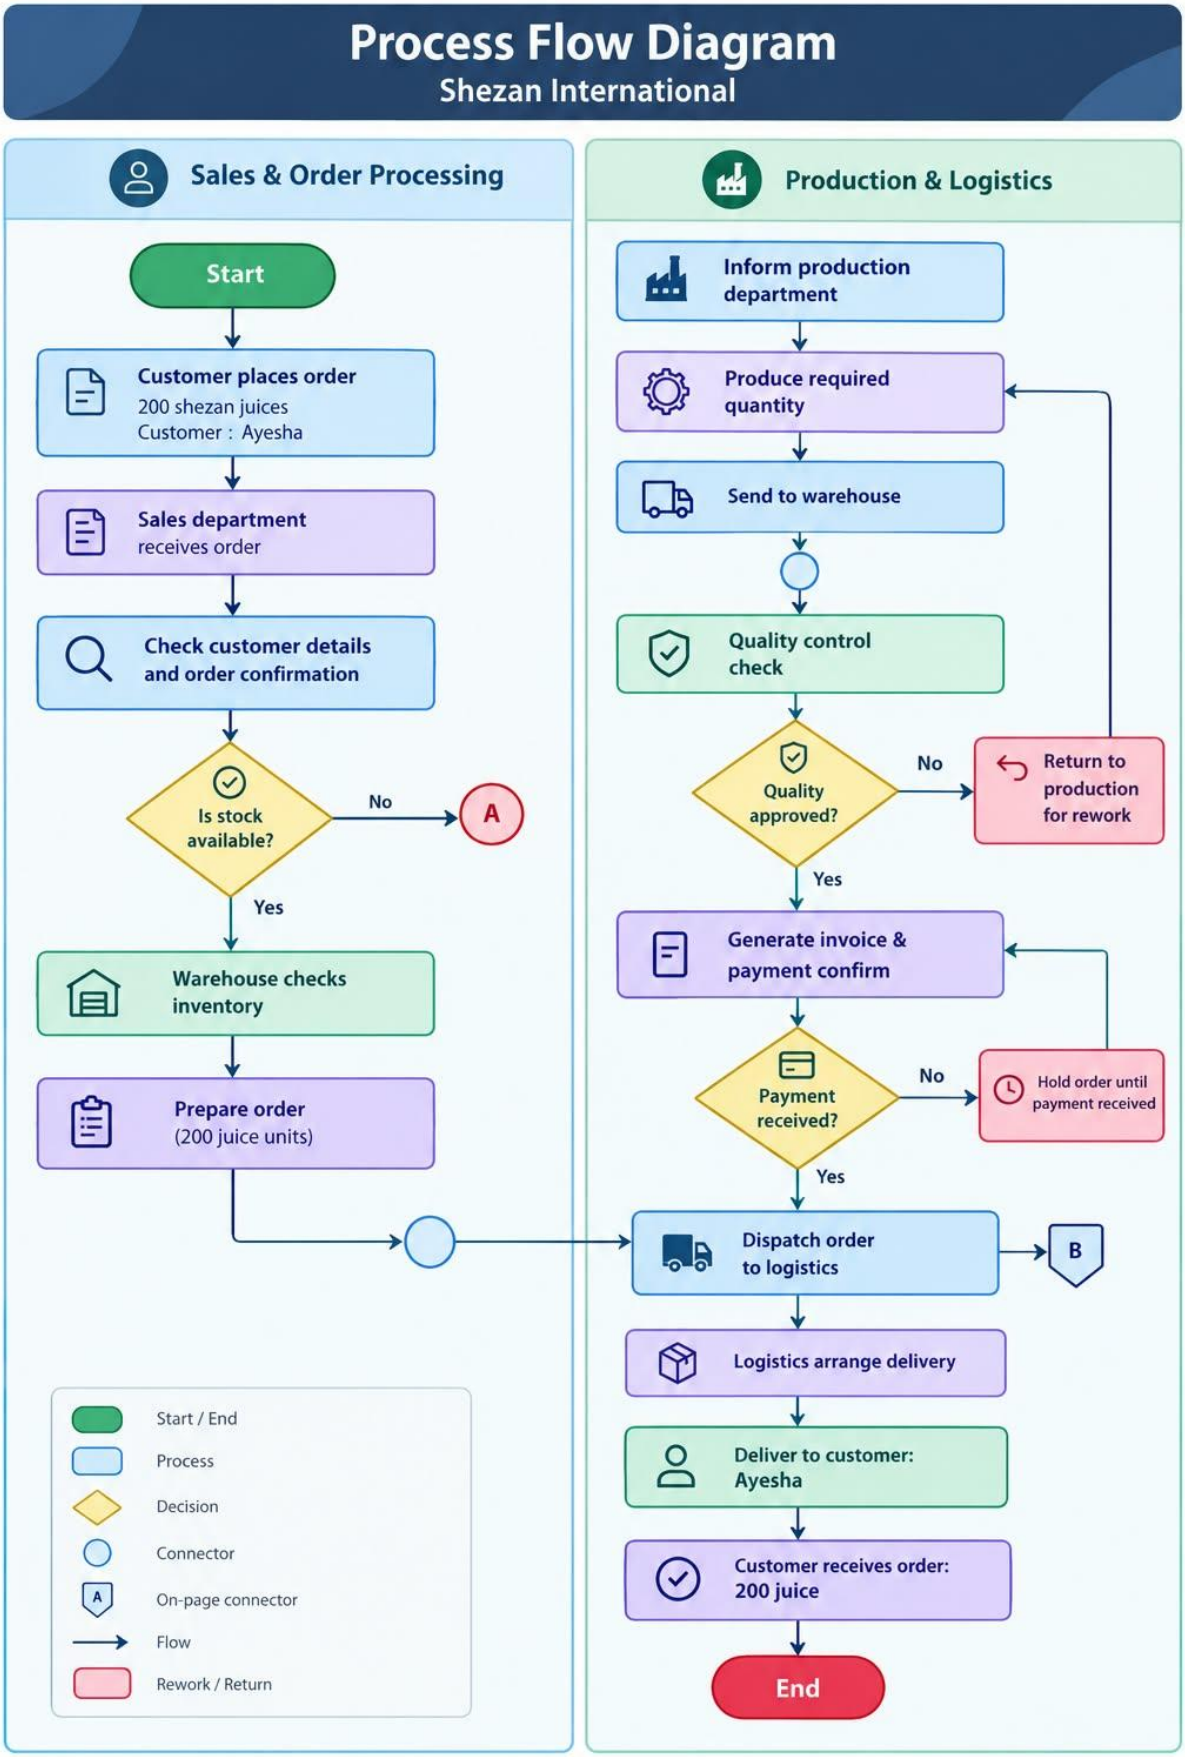

Part 4: Business Models

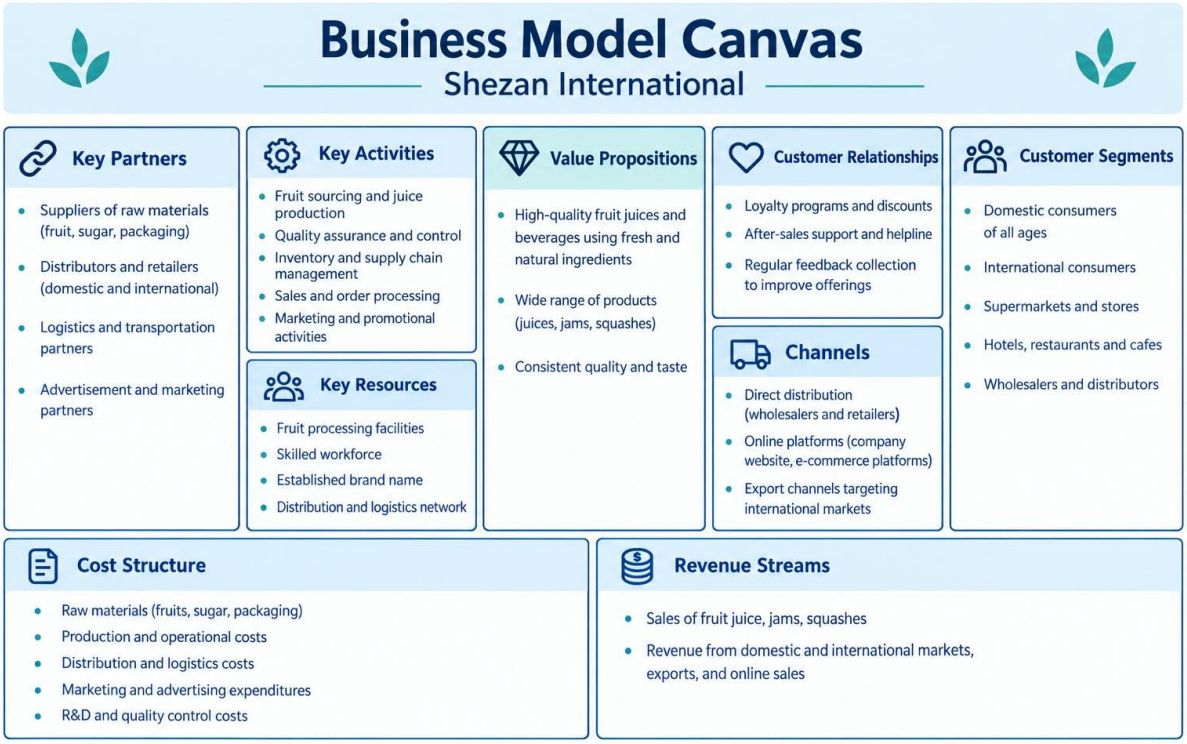

9. Business Models that Shezan International Considers / Works On

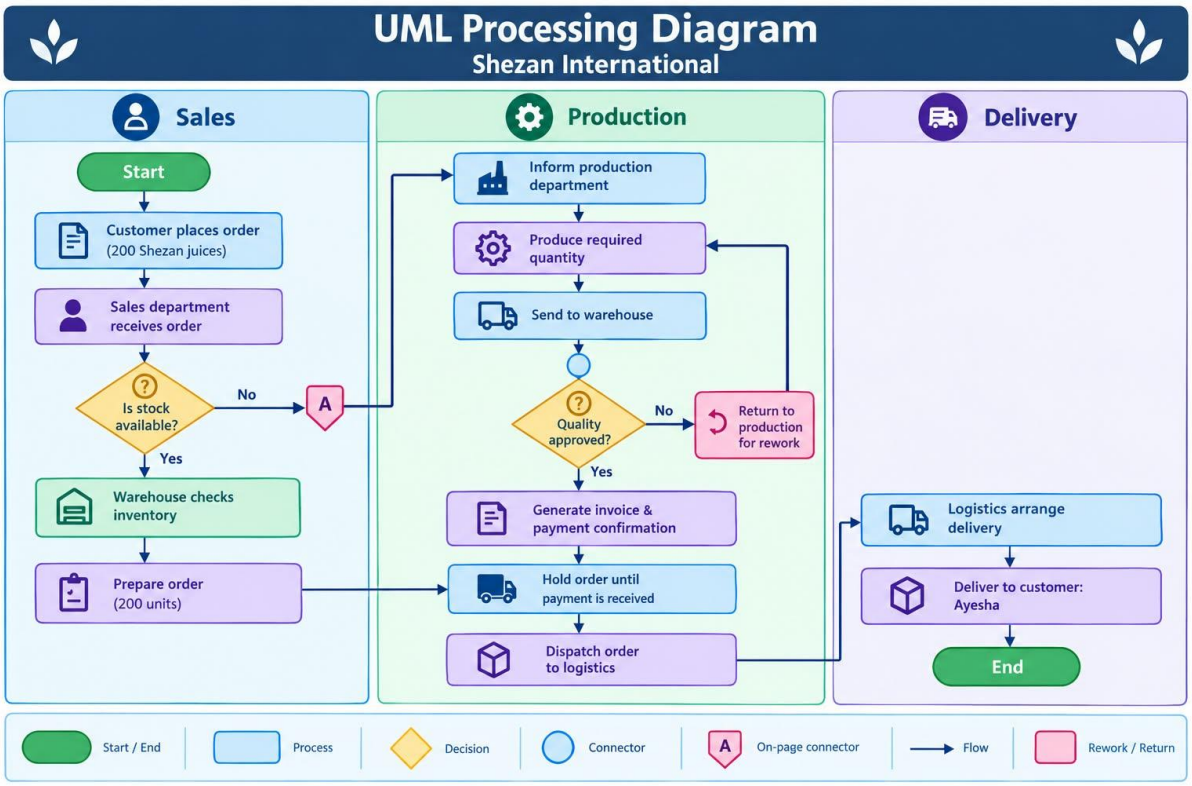

Model	Description	Example
Bundling model	Sell products in combinations.	Vinegar bottle 390 ml + ketchup sachet.
Standardization	Give the same quality and taste everywhere (Lahore, Multan, Karachi, Islamabad, etc.).	Shezan mango juice and ketchup have the same taste everywhere.
Low-touch model	Low cost, no luxury service of fancy stores like Gourmet. Simple selling in normal shops and general stores.	Shezan Happy Farm mango juice sold in general stores.
Pay-as-you-go	Customer pays per product; no subscription.	Customer buys mango juice and pays for it.

10. Models that Do Not Fit Shezan International

Model	Why it does not fit
Brokerage	Shezan is not a middleman; it makes and sells its own products.
Crowdsourcing	Customers don’t create products or content; Shezan produces everything itself.
Affinity club	Shezan does not pay to access another company’s base of customers.
Freemium	Shezan does not offer free versions; all products must be paid for.
Fractionalization	Food products cannot be shared like assets; you buy full items only.
Disintermediation	Shezan uses distributors and retailers; it does not sell directly to customers.
Leasing	You cannot rent juice or ketchup, etc.
Negative operating cycle	Shezan does not receive payment long before delivery.
Product to service	Sells physical goods, not services or outcomes.
Subscription	Customers do not pay monthly; they buy products when needed.
Reverse auction	Shezan does not use a bidding system; prices are fixed in the market.

Business Model Canvas
Shezan International
Key Partners
Suppliers of raw materials (fruit, sugar, packaging)
Distributors and retailers (domestic and international)
Logistics and transportation partners
Advertisement and marketing partners
Key Activities
Fruit sourcing and juice production
Quality assurance and control
Inventory and supply chain management
Sales and order processing
Marketing and promotional activities
Key Resources
Fruit processing facilities
Skilled workforce
Established brand name
Distribution and logistics network
Value Propositions
High-quality fruit juices and beverages using fresh and natural ingredients
Wide range of products (juices, jams, squashes)
Consistent quality and taste
Customer Relationships
Loyalty programs and discounts
After-sales support and helpline
Regular feedback collection to improve offerings
Channels
Direct distribution (wholesalers and retailers)
Online platforms (company website, e-commerce platforms)
Export channels targeting international markets
Customer Segments
Domestic consumers of all ages
International consumers
Supermarkets and stores
Hotels, restaurants and cafes
Wholesalers and distributors
Cost Structure
Raw materials (fruits, sugar, packaging)
Production and operational costs
Distribution and logistics costs
Marketing and advertising expenditures
R&D and quality control costs
Revenue Streams
Sales of fruit juice, jams, squashes
Revenue from domestic and international markets, exports, and online sales
